

We invite you to be part of this innovative business model:

– Themed Art Bars –

New bars are born featuring artwork by Eliseo and other artists. These original works will rotate throughout the entire chain.

Each piece includes a QR code for interaction with a Virtual Assistant.

The problem is that to sell good art, you need a true connoisseur, a skilled art dealer.

WITH VIRTUAL ASSISTANTS,

that problem is over.

...They can even handle payments!

[Link to watch presentation video](#)

On weekends,
ONLINE AUCTIONS
will be held
worldwide together
with other franchisees.

PROJECTION:

The chain will be able to open multiple branches, offering the possibility of international franchising.

Each branch will feature exclusive works of art, accessible digitally through QR codes.

This is an innovative proposal that brings together gastronomy and art. Customers will enjoy the experience of dining while immersed in curated art exhibits.

Not only will original works be exhibited and sold, but they will also generate commissions for franchise owners and help position the brand in the high-end segment.

Franchises are marketed in "ABC1" zones.
